McFactor Multimedia Product

Test Plan

Several thin, dark blue curved lines originate from the bottom left and sweep upwards and to the right, creating a sense of motion or a stylized signature.

The table below lists the tests that will be carried out on the multimedia products to ensure it functions as intended.

Test	Test Description	Intention of the Test
1	Test if the product loads in a browser	To ensure the product can be embedded to a web page
2	Test the navigation buttons	To ensure that the user can move from one page to next page, at will.
3	Test to check if audio plays correctly	To ensure that the audio loads and plays without interruptions, unless muted.
5	Test readability of the text on different computers	To ensure the suitability of font size and colours.
6	Test the interactivity of pictures and buttons	To ensure that the certain pictures and buttons load the required interactivity such as animation and sound.
7	Test if the video plays correctly	Confirm that the video loads and plays properly.
8	Test if all pages open and load as expected	To ensure that the loading of the page is consistent and as expected
